

- 1.3 Megawatt system
- 3,450 Panels
- Current array offsets about 20% of our current electric load
- In 2023 we generated 1,218,234 kWh, which is equal to:
 - 294 tons of waste recycled instead of landfilled
 - 36,838 trash bags of waste recycled instead of landfilled
 - 14,072 tree seedlings grown for 10 years
 - 5.6 acres of US forests preserved from conversion to cropland in one year
 - 1,015 acres of US forest in one year
 - 0.237 wind turbines running for one year

We are still asked to come off the grid at peak times and switch to our diesel generators
Increasing Net Metering would allow us to stabilize our energy costs, realize savings, and invest those very savings into the business and therefore back into the local economy
